

Produce may not be grown within four אמות of a vineyard unless there is a מחיצה. A מחיצה of reeds, provided each reed is within three טפחים of the reed next to it is כשר (not only reeds, sticks or poles would have the same דין).

It is מותר to make a מחיצה with rope. The top rope must be a height of ten טפחים and each rope underneath must be within three טפחים. This מחיצה would be valid for a group or an individual.

If one or two people are enclosed in an open field they can only carry if the מחיצה encloses an area of two סאה or less. Three or more people may carry irregardless of how large the area is.

According to the חזון איש, as long as there is עמוד מרובה על פרוץ, then it is considered a מחיצה דאורייתא (דרבנן, there must be a צורת הפתח).
