

A drink on which there is a doubt if it became טמא, is טמא, but is not מטמא other things.

Blood from animals that were נשחט as קרבנות, and the water used to wash these קרבנות do not place their בשר in a state where they can be מקבל טומאה (unlike other foods that if liquids fall upon them, they are ראוי to be מקבל טומאה), therefore, they can only become טמא through liquids if other liquids besides these fall upon them.

דם that comes out of an animal as it is נשחט does not make the animal in a state that it can be מקבל טומאה.
