

## דף יומי הלכה שבת עח

For carrying out a רביעית of waste water, one is liable (waste water is useful for kneading clay).

In order to be חייב a קרבן for carrying rope, one must be minimally carrying enough to make a handle for a basket. Reed grass, enough to make a loop for a sifter or sieve. Cooking oil or grease, enough to put under a wafer. Tax collector's paper, enough for two letters (tax collectors generally write larger than the average person). For a receipt, if there is enough room in the margin to write two letters, or it is large enough to be used to wrap a small flask of balsam oil, he is חייב. For a tax receipt, one is always חייב as the receipt is always needed.
