

דף יומי הלכה שבת פה

The aforementioned הלכה, that one may plant five types of seeds in a 6×6 טפחים field, is only referring to a case where the field was barren, but if there are other patches nearby, it is אסור because of the proximity of the vegetative growth (being as how in order to facilitate five different types of seed, one is grown in the middle and the other four are grown at the corners).

Therefore, there is a גזירה that one may not plant in the corners of a patch, unless it is the only patch in the field, or if he tore open a furrow between the patch and the one next to it.
