

## סוכה טו

A house that has boards put down, but there is no plaster/cement placed, as long as each board is lifted and put back down (לשם סוכה), or every other board is replaced with כשר סכך, the סוכה is כשר .

If there are iron poles covering a סוכה (which are פסול as סכך), as long as he replaces every other pole with כשר סכך, and is then מוסיף a little more כשר סכך (to ensure that there is a רוב of סכך כשר), the סוכה is כשר.

It is אסור to use כלים for סכך as כלים are מקבל טומאה. Even if a כלי is broken, and is thus no longer מקבל טומאה, nonetheless, it is still אסור to use as סכך.
