

סוכה יח

לבד works whether there are slightly less than three טפחים in the middle of the סוכה, or on the side.

If the קורה (by a מבוּי) does not reach the other wall, or there are two קורות and they do not touch in the middle, in both cases as long as they are within three טפחים the קורה is כשר.

If סכך is placed on an open porch that has walls on two sides, and part of the porch is covered with a roof, the סוכה is כשר if there are two posts (פצימין) placed on each side where the roof ends as it is considered פי תקרה יורד וסותם (even if the posts can only be seen from either the outside of the סוכה, or the inside of the סוכה).

An אכסדרה (an unwalled area with a flat roof) in an open field may be carried in, as we say פי תקרה יורד וסותם (the roof comes down and forms walls).
